INSTRUCTION TO FUNERAL DIRECTORS

Construction of the Coffin. The coffin must be made of wood or a wood by-product which, when placed in a cremator and subjected to the accepted cremation processes, is easily combustible and which does not emit smoke, give off toxic gas or leave any retardant smears or drips after final combustion. No metal furniture or fittings whatever shall be used on a coffin for cremation. No metal of any kind shall be used in the manufacture of such coffin except as necessary for its safe construction and then only metal of a high ferrous content. Cross pieces must not be attached to the bottom of the coffin. If it is desired to strengthen the bottom of the coffin, wooden strips may be placed lengthwise for this purpose. The coffin must not be painted or varnished but may be covered with a suitable cloth. Products manufactured in polyvinyl chloride (PVC), melamine, polyamidone-epichlorhydrin based resins (PAAE), lead and zinc must not be used in the construction of the coffin or its furnishings. The use of Polystyrene must be restricted to the coffin nameplate only in which case it must not exceed 90 grams in weight.

Lining of the coffin. The use of sawdust or cotton-wool must be avoided. If circumstances require, suitable sealing material may be used, but no metal, rubber or polyvinyl chloride (PVC) will be permitted and on no account must pitch or similar substance be used.

Size of coffin. Where the external dimensions of a coffin are likely to exceed length 81 inches (206cm): width 28 inches (71cm): depth 22 inches (56cm) the proper officer of the crematorium must be given advance notice.

The coffin weight must not exceed 21st (136kg).

We confirm that the coffin to be presented for cremation at the above stated date and time has been constructed in accordance with these instructions.
